

b. $3x - 6y = -6$

Example 3: Find the slope and y-intercept of the line.

a. $f(x) = -9x - 9$ slope _____ y-intercept _____

b. $f(x) = \frac{2}{9}x$ slope _____ y-intercept _____

Example 4: Graph the linear equation using the slope-intercept method.

a. $-9x + 2y = 1$
